

Get the most out of your notebook and existing PCMCIA card!

New Computer, Old Cards - No Problem!

The DuelAdapter™ is designed to connect the latest generation of ExpressCard notebook computers with existing 16 and 32 bit cards. The DuelAdapter seamlessly converts input from PCMCIA and CardBus cards designed for cellular broadband, wireless networking, video, audio and memory expansion to an ExpressCard compatible format.

No Compromise in Speed

Data can be transferred at rates up to the full speed supported by the ExpressCard interface - five times faster than USB 2.0.

Easy Set-Up, Easy to Use

The DuelAdapter is easy to set up - just install the driver, insert the adapter into your notebook's ExpressCard slot, and plug your 16 or 32 bit card into the adapter. You can insert and remove your PCMCIA or CardBus card without rebooting.

Available Through:

Features

- Connects PCMCIA and CardBus to ExpressCard-enabled notebook computers and desktop computers
- Fits in 34 mm or 54 mm ExpressCard slots
- Works with standard 32-bit CardBus cards and 16-bit PCMCIA cards
- Data transfer rate up to ExpressCard maximum, limited by PCMCIA card application
- Windows XP™ and Vista™, and Mac OS X™ compatible
- Easy driver installation and set up
- Convenient 2 part module with cable for easy desktop configuration
- Also works with CompactFlash, Memory Stick, Smart Media, MMC and SD cards using suitable adapter (available separately)

System Requirements

- Requires Windows® XP and Vista, or Mac OS X 10.4.8
- 34 mm or 54 mm ExpressCard slot
