Protocol Analyzer:

It is hardware decoding, may log protocol data very long time if without waveforms.
Application timing: Preliminary protocol debug.

Support multiple protocols with different operating modes

Real-time data search

Stack with a DSO as an MSO in logic analyzer mode

Show waveforms with bus decodes

Protocol Analyzer

Show real-time protocol data
Application timing: massive protocol data with some idles in between

Protocol Logger

Like data logger, save massive data into SSD hard drive
Application timing: massive protocol data

Protocol Monitor

Like dash cameras, record protocol data by the device's memory only
Application timing: trigger event only happens in very long time
